ABOUT ASUS

ASUS, the world's top 3 consumer notebook vendor and the maker of the world's bestselling and most award winning motherboards, is a leading enterprise in the new digital era.

ASUS designs and manufactures products that perfectly meet the needs of today's digital home, office and person, with a broad portfolio that includes motherboards, graphic cards, displays, desktop PCs, notebooks, servers, multimedia, wireless solutions, networking devices and mobile phones.

Driven by innovation and committed to quality, ASUS won 3,886 awards in 2011 and is widely credited with revolutionizing the PC industry with the Eee PC™. With a global staff of more than 11,000 people and a world-class R&D team of 3,100 engineers, 900+ support centres worldwide, the company's revenue for 2011 was around US\$11 billion.

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in South East Asia
- The Top 2 notebook brand in China
- The Top 3 notebook brand in Western Europe

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

ASUS received 3,886 awards in 2011

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS - A Top 2 Notebook Brand in South East Asia

Due to consumer trust in ASUS quality and innovative designs, the company has become one of the regional top two notebook brands based on 2011 whole-year performance.

ASUS celebrates another year of business excellence in 2011. Achieving a 145% growth rate last year, ASUS is the only PC brand to display strong expansion for 12 consecutive quarters, despite prominent seasonal factors and a tough global macro-economic landscape with deep impact on Southeast Asia markets and consumption.

ASUS Taichi

"New ideas and technologies pave the way for success"

"ASUS greatly appreciates the recognition we and our products receive from consumers, and would like to thank all channel partners for their great support. We will continue to provide the best quality products through consistent innovation and persistent perfection."

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (page 6).

 Square Trade, 2009/Nov/16th, Report "1 in 3 laptops fail over 3 years"

SquareTrade Report Disclaimer

- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data
- We did not take into consideration purchase locations
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied about the data accuracy of the data

Extreme Test Ensure Top-Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Keyboard Test

ASUS tests the keyboard to check the comfort and durability, especially on keys that are more frequently used.

Abrasive Test

Abrasive resistance test subjects the exteriors of ASUS notebooks to friction, making sure that the colors and surface materials stay at prime conditions even after extensive and demanding use.

Noise Test

ASUS notebooks undergo meticulous noise testing to help promote a quiet and pleasant computing environment for consumers. Noise mitigation, quiet cooling and component seals are all put to test in this set of trials.

Pressure Test

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

Hinge Test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

Vibration Test

Vibration test puts the notebooks on multiple frequency vibrations to ensure that the frame construction outside and the inside of the notebooks are always attached securely.

Shock Test

Notebooks are likely to experience shocks during shipping and day-to-day use. This is why ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Spin Test

Most of the notebook covers can be opened with one hand and this means that the screen has to be flexible. Spin tests are carried out to measure how well the lid is able to protect the notebook by testing it with a twist on the overall framework to an extreme degree.

High Acceleration Test

HALT test (Highly Accelerated Life Test) tests notebooks in high speed stimulations to simulate the movement of a mobile notebook, with an extensive analysis of our engineers to reduce the problems that may occur during transportation.

Port Test

Each port is tested to ensure that it remains strong and solid despite the continuous plug and unplug actions.

Temperature Test

Each ASUS notebook went through many trials to be able to continue to operate in diverse climates. One of the tests is to stimulate an environment of high humidity and low, and also in extreme temperature conditions. Each weak point in the material and framework is strengthened. This is the reason ASUS notebooks have high durability.

Fall Test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its notebooks through a series of drop tests to measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

Marks in History

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. 「The ASUS notebooks never overheated like some of the ones made by other companies,」 said Sergei Avdeev, the Russian astronaut on the space mission. 「Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem.

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Gruelling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. 「Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw,」 said Aviv Shweky, the race organizer.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. 「They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable,」 said Wang.

On the world's highest peak

ASUS Notebooks Are The First to Reach The Top of Mount Everest

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

ASUS won 3,886 awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

ASUS VivoBook

TOUCH • THE WORLD AT YOUR FINGERTIPS

Inspired by the Latin verb for 'to live', ASUS VivoBook is a personal companion that blends the unique elegance of ASUS notebook design with the Windows® 8 touch-friendly operating system. ASUS VivoBook embodies the spirit of touch to maximise intuitive interaction, offering naturally enjoyable user experiences that enhance every aspect of your lifestyle. It has been designed with stand-out aesthetics, true-to-life sound, and instinctive touch. They are ideal for the increasingly cloud-based nature of computing, supporting seamless connectivity and usage on the go.

Optimized for Windows® 8, ASUS VivoBook presents an attractive, durable and very portable design. They integrate ASUS SonicMaster audio and 2-second Instant On, and all models include 332GB of WebStorage cloud space for three years. ASUS VivoBook embodies a new way of offering enjoyable and intuitive notebook experiences to customers.

The beauty of Ultrabooks

ASUS Ultrabook series - VivoBook S400 delivers new, exciting and differentiated user experience with the emphasis in the sleekness, responsiveness and battery life. ASUS continuously seeks improvements and breakthroughs in these areas to bring leading edge technology to you.

Touch Screen

Unleashes the power of Windows 8 which allows playing of app games easily with 10-finger input

Larger Smart Gesture Touchpad

Larger Smart Gesture touchpad with screen matching proportions allows more intuitive control and easier comfortable usage.

2-second Instant On

Resume your activity in 2 seconds from sleep mode. Now you can minimise resume time with ASUS 2-second Instant On technology.

Quick Charge, even when powered off

Exclusive Quick Charge technology lets you charge your peripherals such as mobile phones, even when your laptop is powered off

Incredible Audio Performance

Incredible audio performance with lifelike vocals, a wider sonic range, deeper bass, and powerful output

Clear and fluid video recording

The integrated HD camera is designed to provide crisp, clear and fluid video recording even in low-light situations, with 1280x720 resolution and 30fps with MPEG video compression.

SuperBatt Technology

With SuperBatt technology, ASUS laptops comes with a longer battery recharge cycle longevity of up to 3 times. Now you can be rest assured that the percentage of fully charged capacity will be kept high even after long-term usage

IceCool Technology

IceCool technology ensures that palm rests stay below body temperature, so they feel cool even during the longest typing sessions

Ultra thin & light

Ultra slim and light for optimised mobility, and yet durable to handle everyday stresses

Beautiful, fast, fluid

ASUS S·SERIES

Performance Ultrabook™ with optical drive

New ASUS S Series ultrabooks are crafted for multitasking and multimedia that go wherever you go, clad in exquisite design.

Brushed hairline aluminium textures offer high high durability and an elegant look, with a sleek form that integrates hard drive storage and an optical drive - perfect for work and entertainment. Adding to compact style finesse, the chidet keyboard and smart-gesture oversized palmrest gives you intuitive input, with Super Hybrid Engine II ensuring you're always back on in just 2 seconds.

Beyond being extra thing and light, ASUS S ultrabooks pack a full feature set in just 21mm. One piece molded top casing reinforces notebook strength and rigidity, and the entire style embodies subtlety that meets all your performance portability needs.

The beauty of Ultrabooks

ASUS Ultrabook series - S series deliver new, exciting and differentiated user experience with the emphasis in the sleekness, responsiveness and battery life. ASUS continuously seeks improvements and breakthroughs in these areas to bring leading edge technology to you.

2-second Instant On
Resume your activity in 2 seconds from sleep mode. Now you can minimise resume time with ASUS 2-second Instant On technology.

Slim profile
Ultra slim profile for optimised mobility, and yet durable to handle everyday stresses

Quick Charge, even when powered off
Exclusive Quick Charge technology lets you charge your peripherals such as mobile phones, even when your laptop is powered off

SonicMaster Lite
Incredible Audio Performance
Incredible audio performance with lifelike vocals, a wider sonic range, deeper bass, and powerful output

Clear and fluid video recording
The integrated HD camera is designed to provide crisp, clear and fluid video recording even in low-light situations, with 1280x720 resolution and 30fps with MPEG video compression.

SuperBatt Technology
With SuperBatt technology, ASUS laptops comes with a longer battery recharge cycle longevity of up to 3 times. Now you can be rest assured that the percentage of fully charged capacity will be kept high even after ling-term usage

Built-in Optical Drive in 21mm Profile
With just 21mm profile thickness and the light weight, ASUS S6 Series brings you enhanced mobility. Now with the built-in optical drive, you can enjoy your high definition movies and music content anywhere anytime.

MULTIMEDIA SERIES

ASUS N-SERIES HEAR THE INCREDIBLE, FEEL THE POWER

Audio by Bang & Olufsen ICEpower®

ASUS N Series multimedia notebooks represent an entirely new standard in ASUS design thinking towards delivering greater customer happiness. They feature a focus on attractive design and aesthetic appeal alongside the finest professional-grade audio offered on notebooks.

Featuring co-development with bang & Olufsen ICEpower® and Waves MaxxAudio, upgraded SonicMaster Premium utilizes professional sound processing tools to boost audio fidelity and enjoyment. In addition to a wider range and improved clarity, N Series notebooks include a bundled subwoofer for extra-impactful bass, culminating in the finest audio on any laptops. Technical Grammy award-winning MaxxAudio is one of the leading professional audio processing tools in the sound industry.

Defining Entertainment

ASUS SonicMaster audio, co-developed with Bang & Olufsen ICEpower® delivers crisp highs to full mids which are perfectly balanced with the pounding bass from the bundled external ASUS subwoofer, giving you an audio experience you wouldn't expect from a notebook.

With the latest in LED panel technology that delivers clearer and brighter images, N series notebooks deliver pristine Full HD videos better than ever. Experience entertainment as it was meant to be.

2-second Instant On

Resume your activity in 2 seconds from sleep mode. Now you can minimise resume time with ASUS 2-second Instant On technology.

Quick Charge, even when powered off

Exclusive Quick Charge technology lets you charge your peripherals such as mobile phones, even when your laptop is powered off

SuperBatt Technology

With SuperBatt technology, ASUS laptops come with a longer battery recharge cycle longevity of up to 3 times. Now you can be rest assured that the percentage of fully charged capacity will be kept high even after long-term usage

Larger Smart Gesture Touchpad

Larger Smart Gesture touchpad with screen matching proportions allows more intuitive control and easier comfortable usage.

Clear and fluid video recording

The integrated HD camera is designed to provide crisp, clear and fluid video recording even in low-light situations, with 1280x720 resolution and 30fps with MPEG video compression.

Wide Viewing Angle

Premium screens support up to 150° horizontal by 120° vertical angles, expanding visual enjoyment from almost any direction. ASUS brings you living room image fidelity, with uncompromising display fitness that gives you the best viewing experience possible.

Incredible Audio Performance

Incredible audio performance with lifelike vocals, a wider sonic range, deeper bass, and powerful output

MaxxAudio 3

Harnessing the power of the same tools heard on countless hit records and major motion pictures, now you can enjoy louder, clearer, fuller, and more intelligible sounds with your laptop.

Elegant, Luxurious Design

Although brand new, N Series notebooks have already secured a coveted 2012 RedDot Design Award for their attention to stylish materials and design considerations.

ROG-GAMING SERIES

BORN TO CONQUER

ROG
G SERIES

THE ULTIMATE FIGHTING MACHINE

Republic of Gamers G series gaming notebooks bring the uncompromising performance of a fully-fledged gaming PC to a sleek, stylish and portable form factor. Inspired by the stealth fighter, the G Series' dynamic lines, sculptured form factor and matte black finish are complemented by a unique thermal design. Equipped with the 3rd generation Intel® Core™ CPU, and the latest NVIDIA® GeForce™ enthusiast level graphics with Active Shutter 3D technology, the G series notebooks' extreme performance offers you an immersive gaming experience.

An Intense Audio/Visual Feast

Eye strain will be a thing of the past with the G Series's matt finish anti-glare display while the wide viewing angle reduces the dead zone and helps to improve visibility during gaming - particularly in dark environments. The built-in subwoofer, complete with SonicMaster audio technology ensures a rich and powerful experience that will ward off challengers.

Incredible Thermal Efficiency

The ROG-G Series pack massive performance punch, which needs to be kept cool - the dual fan filter system enables you to keep your system r cooler and quieter, for longer. The unique, intelligent thermal design improves power and thermal efficiency by exhausting hot air from the machine, enabling you to leave the competition battling for survival in your wake.

SonicMaster**Incredible Audio Performance**

Incredible audio performance with lifelike vocals, a wider sonic range, deeper bass, and powerful output

**EAX 5.0 Audio**

Superior audio playback for a true-to-life gaming experience

**DirectX 11**

More efficient and leverage the power of today's multi-core processors. Smoother 3D animators, and graphics are more lifelike and nuanced than ever before

**Intelligent Cooling & Easy-clean System**

Dual intelligent fan design of rear venting allows extreme performance. Dual fan filters design allows for extreme performance as well and in addition provides the best system stability.

**Game-centric Design**

Seamless one-piece backlit keyboard with isolated arrow keys and ergonomic inclined design

**3D TV Output**

Experience your 3D gaming action on your TV screen! 3D TV output on both Full High Definition and 3D models allows you to immerse yourself in the action fully with a bigger screen.

Beautiful, fast, fluid  Windows 8

WORLD'S 1ST
JELLY BEAN
TABLET

nexus⁷

The playground is open

Nexus 7 was built by ASUS and comes with a NVIDIA® Tegra® 3 quad core processor so everything is faster – pages load quickly, gameplay is smooth and responsive, and running multiple apps is a breeze.

Designed with gaming in mind

Nexus 7 was designed with gaming in mind. With heart pounding quad-core performance and sensors like a gyroscope and accelerometer – do a barrel roll then tilt, touch and tap your way to the top of the leaderboards while exploring over 600,000 available apps and games.

Thin, light and portable.

Nexus 7 was built to bring you the best of Google™ in a slim, portable device that fits perfectly in your hand.

Less charging, more doing.

With over 9 hours of HD video playback, 10 hours of web browsing or e-reading, and up to 300 hours of standby time, Nexus 7 lets you spend less time charging and more time doing.

Stunning 7" display.

Nexus 7 brings your apps, games and entertainment to life in stunning clarity on a vibrant 1280-by-800 high-resolution display protected by scratch resistant Corning™ glass. With over one million pixels in your hand, text is sharper, HD video is more vivid and gameplay is smooth and dynamic.

The world's most popular platform.

Nexus 7 is powered by Android 4.1, Jelly Bean, the latest version of the world's most popular mobile platform. With smarter notifications, beautiful new widgets and home screen customization that's as easy as drag-and-drop – Android is faster and more intuitive than ever.

Best of Google

Nexus 7 comes with all your favorite Google Apps – like Gmail™, Chrome™, Google+™ and YouTube™ – putting the best of Google in the palm of your hand.

Made for Google Play™

Nexus 7 was made for Google Play, putting all the entertainment you love right in your hand, with over 600,000 apps and games.

**Available colours of sleeve case may vary in respective countries.*

ASUS Transformer Pad

The Quad-core gaming tablets that gives you high-definition gaming experience

The NVIDIA® Tegra® 3 processor is the world's only 4-PLUS-1™ quad-core mobile processor that features a 5th battery-saver core. The result is outstanding performance and amazing battery life. Gaming, web browsing, and video never looked so good.

ASUS Transformer Pads with NVIDIA Tegra 3 Quad-core CPU & 12-core Graphics

ASUS Transformer Pads use Tegra 3, with 4-PLUS-1 processor, which gives you a high definition gaming experience with higher resolution textures, and dynamic environments and ambient effects such as rubble and liquid stimulation. The characters are also enhanced with simulated objects and shadows, and are more detailed as well, including the environments through enhanced shaders. It also allows Ragdoll physics simulation and enhanced dynamic foliage.

ASUS VivoTab™ RT

Transform to Incredible

A Brand New Start for Mobile Productivity

You are always on the go. You enjoy having a light and stylish tablet with you to stay in touch with friends and to enjoy multimedia. But occasionally, you need to get some serious work done. Before you had to bring your notebook with you, but now you can do it all on your VivoTab. Break the limitations of traditional tablets. Move beyond being only the spectator. Be the Creator.

Featuring Windows RT and Office Home & Student RT preview*, its the lightest 10.1" RT tablet around, weighing a mere 525g with a slim 8.3mm thin profile, making it the perfect tablet to carry everywhere.

Hidden hinge design, Evolved Transformation

A detached dock with a stylish, hidden hinge design presents a clean, simple and elegant view that's intuitively easy to adjust. Built to compliment the VivoTab RT, it offers the best mobile experience for work and play.

Connectivity and expansion

Store and share with 32GB eMMC built-in memory, a USB port and 32GB WebStorage for 3 years. You can also simply link and pair up with various NFC-enabled devices and peripherals to read or share information.

Pre-loaded with Microsoft Office

Combined with the Mobile Dock, the VivoTab RT is transformed into a productivity powerhouse.

ASUS recommends Windows 8

ASUS S Series

Performance Ultrabook™ with optical drive

Extra thin and light, the ASUS S Series Ultrabook packs full features in a sleek 21mm, giving you SSD speed, hard drive storage capacity, and optical media. Its chiclet keyboard, smart-gesture touchpad, and large palm rests afford intuitive input, with Super Hybrid Engine II ensuring 2-second instant on. Using up to 3rd generation Intel® Core™ i7 processors and discrete graphics, it's perfect for mobile productivity and entertainment.

Beautiful, fast, fluid  Windows 8
